MATERIALS RESEARCH BULLETIN

Editor-in-Chief: **HEINZ K HENISCH**, *Materials Research Laboratory, The Pennsylvania State University, University Park, PA 16802, USA*

The *Materials Research Bulletin* is an international 'rapid publication' journal reporting research on crystal growth, materials preparation and characterization. It deals with the structure and properties of electronically, optically or mechanically interesting solids considered and discussed specifically as a function of the preparational parameters. It covers such topics as the synthesis of new phases, high pressure and high temperature phase changes, crystal growth mechanisms and techniques, defect structure analysis, the preparation and structure of non-crystalline solids and composite materials.

A Selection of Papers

M SACERDOTE, F BOSSELET & B F MENTZEN (France), The MFI(ZSM-5)/sorbate systems. Comparison between structural, theoretical and calorimetric results. Part II - The MFI/Benzene system.

Y REPELIN & E HUSSON (France), Etudes structurales d'alumines de transition. Part I - Alumines gamma et delta.

J K NANDAGAWA, P K PATIL & R D LAWANGAR-PAWAR (India), Electroluminescence of (ZN, Cd)S: Mn:Sm powder and sintered film phosphors.

E A RIETMAN (USA), Electrical properties of alpha-cyclodextrin metal iodide inclusion compounds.

PROGRESS IN SURFACE SCIENCE

AN INTERNATIONAL REVIEW JOURNAL

Editor: **SYDNEY G DAVISON**, *Applied Mathematics Department, University of Waterloo, Ontario, Canada N2L 3G1*

Managing Editor: **W K LIU**, *Physics Department, University of Waterloo, Ontario, Canada N2L 3G1*

By separating matter into its three phases, surfaces (or interfaces) play a leading role in nature. As a result of this, surface science has evolved as an interdisciplinary subject, so that phenomena associated with surfaces are of fundamental interest to a wide variety of scientists.

With this in mind, the *Progress in Surface Science* series publishes review articles on as wide a range of surface phenomena topics as possible.

A Selection of Papers

G S WAS (USA), Ion beam modification of metals: compositional and microstructural changes.

G H VURENS, M SALMERON & G A SOMORJAI (USA), The preparation of thin ordered transition metal oxide films on metal single crystals for surface science studies.

P M ECHENIQUE (Spain) & **J B PENDRY** (UK), Theory of image states at metal surfaces.

A CISZEWSKI (Poland) & **A J MELMED** (USA), Epitaxy of metals on metal substrates: the contribution of field electron emission microscopy.
